## Career Summary

---

**March 2018 - Present**

**Partena Professional, Plovdiv  
Consulting SQL Server Database Admin**

### Key Responsibilities

- ✓ Responsible for the daily administration, support, maintenance, availability, patching, performance, security, and backups of SQL Server database infrastructure for over than 250 instances.
- ✓ Lead in the architecture, design, development, and implementation of SQL Server databases.
- ✓ Evaluate, diagnose, research, analyze and provide options to resolve database, server performance, and related problems.
- ✓ Database performance monitoring and index tuning.
- ✓ Troubleshoot database and server performance problems, including issues with SQL Server high availability solutions.
- ✓ High-quality SQL that conforms to design and functional requirements.
- ✓ Provide support to other development engineers, QA personnel, and product management leaders.
- ✓ Support staff in areas of expertise and domain knowledge.
- ✓ Support and provide input for feature definition and analysis.
- ✓ Maintain and implement Disaster Recovery planning from a database point of view.
- ✓ Code review database queries used in the system and provide optimizations.

**May 2017 – February 2018**

**Ria Solutions Group, Plovdiv**  
**SQL Server ETL and T-SQL Developer**

**Key Responsibilities**

- ✓ Working with BIG Data
- ✓ Design, build and deploy effective SSIS packages
- ✓ Implement stored procedures and effectively query a database
- ✓ Translate requirements from the business and analyst into technical code
- ✓ Identify and test for bugs and bottlenecks in the ETL solution
- ✓ Ensure the best possible performance and quality in the packages
- ✓ Provide support and fix issues in the packages
- ✓ Extract data from internal database system to files
- ✓ Help write and optimize in-application SQL statements
- ✓ Ensure performance, security, and availability of databases
- ✓ Prepare documentations and specifications
- ✓ Handle common database procedures such as upgrade, backup, recovery, migration, etc.
- ✓ Profile server resource usage, and optimize and tweak as necessary
- ✓ Working with Azure Blob storage

**May 2015 – April 2017**

**Xogito, Plovdiv**  
**SQL Server Database Engineer**

**Key Responsibilities**

- ✓ Design and develop data movements using SQL Server SSIS, TSQL and Stored Procedures
- ✓ Design and perform Extract, Transform and Load (ETL) processes data activities via Import/Export wizards using SQL Server Integration Services (SSIS) between heterogeneous environments
- ✓ SQL Server RDS Service support
- ✓ AWS – S3, EC2, VPC
- ✓ Creating Reports for customers
- ✓ Consult with the business to determine logical design for new business solutions
- ✓ Follow data standards, resolve data issues, complete unit testing and system documentation for ETL processes
- ✓ Collaborate with IT operations and testing organizations to ensure timely releases of projects and make sure database environments are sustainable
- ✓ Collaborate with IT operations to perform root cause analysis
- ✓ Use customer requirements to improve functionality (speed, performance / usability)
- ✓ Respond quickly to bug fixes and enhancement requests
- ✓ Participate in special projects as needed and performs other duties as assigned ✓ Work in a team environment
- ✓ Optimize database code by analyzing query execution plans

**April 2014 – April 2015**

**ActivTrades, Sofia**  
**SQL Server Database Administrator**

**Key Responsibilities**

- ✓ Monitoring the health and performance of multiple databases
- ✓ Promote code changes from the development team to the production environment
- ✓ Tuning indexes, stored procedures and more for performance, scalability and security
- ✓ Responsibly handling confidential data and assisting with compliance goals
- ✓ Managing data replication and automated jobs for maintenance
- ✓ Implement and maintain High Availability solutions such as AlwaysOn Availability Groups
- ✓ Administering permissions and improving our overall security posture
